

SAN IGNACIO VISTAS, INC.
Architectural Committee
APPLICATION FOR PAINTING

Applicant's Name: _____ Date _____

Address: _____ Lot #: _____

Phone Number(s): _____ Email: _____

REFER TO THE REVERSE SIDE FOR GUIDELINES

SURFACE TO BE PAINTED	COLOR	METAL	LOW SHEEN
MAIN STUCCO			
UTILITY BOXES			
ROOFLINE TRIM /GUTTER/DOWNSPOUT			
FRONT DOOR			
GARAGE DOOR			
SECURITY DOOR (S)			
GATES/RAILINGS			

Describe other places where your trim/accent color(s) will be applied if other than the roofline.
Do you have a FLAT ROOF? Be sure to review Item 9 on the reverse side when sealing your roof.
Be specific as to the other areas you are painting. You will be asked to supply a paint chip to ensure there will be a proper color match if any new surface is intended to match an existing color.

Check to indicate work is to be performed by Owner _____, or provide the following:

Contractor Name: _____

Date work is to begin: _____ Estimated completion: _____

Please Review Paint Guidelines and Definitions

- _____ I would like to set-up an appointment with the Color Consultant of the AC Committee.

Additional Info Requested: _____	Date Reviewed: _____
Action: _____	

Response to Homeowner	_____
Date: _____	Approved by: <i>Committee Member or Secretary</i>

San Ignacio Vistas Inc.
PAINT GUIDELINES

Owners are to complete and submit this form for all exterior painting. This is to ensure that approved colors are being used and the Association has a record of when painting was completed. Plan accordingly to have your application approved prior to the start of work. This process should take less than a week. **ALL applications must be approved** prior to proceeding with any painting.

Note: Since changes are made from time to time, it is important to submit a paint request for all projects.

Guidelines for the painting process using the SIV Paint Palette.

1. Select the **MAIN STUCCO** color from Section 1.
2. You may select two colors from Section 2 for use as **TRIM/ACCENT**. These colors may be applied to portions of your home. The following is not meant to be a complete list of possibilities. Roofline trim and gutters attached to the roofline trim; window and garage bump outs; security/ metal doors, gates and railings; column and wall bump outs; exterior wall chair rail; niches and the flat wall surrounding recessed windows.
Because there are so many options the AC Committee has a Color Consultant that can offer guidance on items that could be painted to enhance the design features of your home.
3. **Front Doors** may be painted with a color that resembles wood.
4. **Utility boxes** shall match the color to which they are affixed. **Any downspouts or conduit that** cross over different surfaces shall match the color to which they are affixed.
5. **Garage doors on homes that have all slump block (brick)** shall be painted using one of the colors from Section 3 of the SIV Paint Palette.
6. **Items mounted on slump block (brick)** shall be painted to blend with the brick using one of the colors from Section 3 of the SIV Paint Palette.
7. **Security doors, metal or wooden gates, and metal railings** should be painted or stained using a recommended product.
8. **Simulated Brick (slump block)**: These bricks are porous. It is recommended that the homeowner seal brick as often as repainting is suggested.
9. **Parapet Walls & Ductwork on Heating/Cooling Units on Flat Roofs**: These items visible from neighboring lots or from above streets shall not be painted bright white, and require tinting. The color used must be approved.

SIV paint colors have been established using the Dunn Edwards Color Matching system. You may borrow the Paint Palette book from the Secretary which contains paint chips and guidelines. You can also view available colors on the Dunn Edwards website, but color monitors are not an accurate representation and paint chips should be ordered from this site. https://www.dunnedwards.com/colors/archive/color-ark_pro/san-ignacio-vistas/san-ignacio-vistas

You may use paint other than Dunn Edwards but must ensure that the color is properly matched.

PAINT & SEALANT QUALITY -- QUALITY refers to longevity and/or tendency to fade. Paint and sealants consist of varying amounts of "solids". The greater amount of solids generally increases the life (and price) of the product. Many paint and sealant manufacturers provide the same paint color in different formulations of paint and sealant solids. Since labor is the largest cost of most jobs it is wise to use the best paint to obtain a finished product that will give you maximum life. It is suggested that the homeowner discuss with his contractor both the color and quality of paint and sealants.
